

Announcement 2/22/14

Dear Florida Psychologists, Counselors, Social Workers, Attorneys, Psychiatrists, and Physicians:

We are pleased to announce the alliance of two neuropsychology and behavioral health practices, [Clinical Psychology Associates of North Central Florida](#) (CPANCF) and [Comprehensive MedPsych Systems](#) (CMPS), in providing comprehensive neuropsychological and psychological evaluation and psychotherapy treatment services in Ocala and Gainesville. While each practice will retain sole responsibility for services they provide we believe the quality and reputation of both groups will be geometrically enhanced by our working association out of our joint office space at:

3002 SE 1st Ave. Bldg. 300 Ocala, FL 34471 & the main CPANCF offices at 2121 Northwest 40th Terrace Suite B, Gainesville, FL 32605

Evaluations may include dementia, MCI, chronic pain, TBI, mTBI/concussion, psychiatric vs neurological differential, ADHD, LD, Gifted, and a wide range of other areas of cognitive, somatic, and psychiatric conditions. A further alliance with an on-site psychiatrist in Ocala, Dr. Domingo Cerra, rounds out the team available to provide comprehensive behavioral healthcare services. We feel this is unique in providing a one-center alliance for psychological, neuropsychological and psychiatric services in the Ocala area.

Dr. Bordini and *Clinical Psychology Associates of North Central Florida* will continue to provide comprehensive 1.5 to 2-day evaluations for individuals with financial resources or those who wish to go out-of-network. Along with the existing alliance with Dr. Clifton in Gainesville, CPANCF and Comprehensive MedPsych Systems will now be able to arrange for in-network neuropsychological, psychological, and psychotherapy services for individuals with Medicare, BCBS, Aetna, Cigna, Humana, and many other insurance plans as well as Worker's Comp, DVR, and forensic evaluations.

All referrals will be triaged through CPANCF offices at: (352) 336-2888. We appreciate your referrals.

Ernest Bordini, Ph.D.

see next page for more about CMPS and CPANCF

[Comprehensive MedPsych Systems](#), has grown and developed into the largest and most comprehensive private behavioral health provider group in Florida. CMPS provides the highest quality behavioral and mental health evaluation and treatment services on the west coast of Florida with its main office in Sarasota and satellite offices in Bradenton, Venice, North Port, Tampa, Port Charlotte, Lakewood Ranch, and now Ocala and Gainesville. Since 1998, CMPS has grown due to the intense focus on quality, caring, and nurturing support. We provide a team of providers and comprehensive services which is unique and unmatched in scope and breadth in Florida.

[Clinical Psychology Associates of North Central Florida](#) has long been an established part of the community with offices in Gainesville and Ocala and EAP services for City of Gainesville employees. For more than two decades, CPANCF has been devoted to providing quality adult and pediatric clinical and forensic psychological, neuropsychological assessment and consultation services to the North Central Florida community. CPANCF also focuses on fitness for duty evaluations, EAP services and consultations and services to law enforcement agencies. Fiercely independent and committed to truly private care which is not compromised by third party insurance limitations or restraints, CPANCF is out-of-network for most insurance plans, but will provide a superbill for those who wish to bill for out-of-network reimbursement. CPANCF is the owner/publisher of [NeuropsychologyCentral.com](#) established in 1995 as one of the internet's oldest meta-site for those interested in neuropsychology.
